

CLIN1 Suite

Every medical facility is different. You need a Pharmacy System flexible enough to allow you to run your pharmacy your way. CLIN1 Pharmacy can provide that flexibility while allowing you to streamline your operations, reduce medication errors and maintain better inventory control. In addition, our multiple integration options allows for more efficient communications with your existing IT environment allowing for more timely, accurate charge collection while decreasing double-entry of patient information. If you're tired of wasting time and money, you need CLIN1 Pharmacy..

...flexibility

Pharmacy Management for the 21st Century

Features...

- Provides user with means of maintaining an accurate account of drug administration and distribution
- Electronic tracking of inventory and pricing of items via bar coding technology
- Maintains electronic log of inventory, reducing time needed for manual logging and tracking of medication
- Generates charges for your existing billing system saving time and improving accuracy (requires HL7 Interface)
- Pop-up alerts of expiring items
- Low inventory warnings, reduce over head costs associated with on-site inventory
- Generates departmental utilization figures
- Tracks product turn-over, adding "just in time" functionality to your pharmacy
- Ability to generate out-date reports for out of date medication lots (and recalls)
- Avoid out-of-stock CRISIS
- Improves accountability of inventory
- Incorporates your pharmacy into your hospital information system and decreases double entry of patient data
- Provides a system that can be used and understood by "temporary" personnel
- User definable drug interactions for drug-drug and drug-allergy notification
- Built-in multi-level security
- HIPAA compliant
- Tracks physician contact information
- Built in Event Log tracks system access and activity
- Many built-in reports and logs
- Additional reports and logs available by request
- Drug-to-drug interaction codes available for an additional charge
